Q. WE WOULD LOVE TO TURN OUR HOUSE INTO OUR FOREVER HOME. HOW AND WHERE DO WE START?

A. I firmly believe there's no place like home, so I always welcome the opportunity to transform a beloved house into a "lifetime friendly" home—a much nicer adage than "aging in place." With any renovation project, our first step would be a conversation about your future needs and goals. Depending on the age and architectural style of your home, your wish list might include a spacious master suite on the first floor; an integrated kitchen, dining and living room; wide hallways; new windows; and even a heated driveway and pathways. From there, I can help you create a timeline, develop a budget, and select an experienced architect and builder. Once the construction is finished, we'll add color and comfort with new furnishings, decorative lighting, and fun accessories.

I always say, designer details are the icing on the cake—and every cake deserves icing!
