MINT INTERIOR DESIGN

PHOTOS SPACECRAFTING

FEATURED PROJECT | Elevated Living

The owners, professionals and empty nesters, purchased a condo with a large open floor plan, magnificent views of downtown Minneapolis...and zero character. To honor their introspective spirits and refined taste, mint interior design worked to create an elevated and contemporary space, mixing a sense of zen with an edgy rock-and-roll style. It was essential that the interiors enhance and not detract from the breathtaking skyline.

A key component of the design was marrying the exterior façade of the building with the interior. A brick veneer was installed onto the perimeter walls with a custom patina finish to achieve a timeworn surface. This backdrop introduces texture and warmth without overpowering the scenic splendor and serves as the tonal palette for the entire dwelling.

Building on this quiet but impactful detail, specialty finishes were selected for the ceilings, walls, and columns. A whimsical, Banksy-inspired wall mural was commissioned, and brought a nondescript corner of the condo to life. The end result is an urban home designed to exude harmony, reflect the interests and personalities of the owners, and bolster the panoramic views. Elevated living indeed, both literally and figuratively!
